December 20, 2012

Honorable Mayor Mark D. Boughton  
Honorable Members of the Danbury City Council  
155 Deer Hill Avenue  
Danbury, CT 06810

**RE: Monthly report for November 2012**

Dear Mayor Boughton and Members of the City Council:

I am pleased to present the Public Works Department report for the month of November.

The Public Works Department was pleased to provide the necessary services to bring Uncle Sam to the main lobby at City Hall. The Public Buildings Division coordinated the installation of the statue, placement of the photo from the Danbury Fair and the recognition plaque. We have received many positive comments from the members of the public who have visited City Hall.

Clean-up continued in November from Hurricane Sandy. The Forestry, Highway and Park Maintenance Divisions worked tirelessly to open roads and clear debris. The Equipment Maintenance Division was available at all times to keep the equipment in operating condition and make immediate repairs as necessary. In between the clean-up, the Park Maintenance Division worked on installing the holiday lights and decorations.

We continue to perform drainage and other road repairs, weather permitting.

Should you have any questions regarding any of the separately submitted division reports please call me at 203-797-4537.

## **Construction Services Report submitted by Thomas Hughes III, Superintendent:**

**White Street ARRA Project:** With the remaining balance of our ARRA funding ,ConnDot has supported a formal request from the City of Danbury to install crosswalks and pedestrian signals on White Street. ConnDot has approved and processed the change order request. The contractor has been given a directive to proceed with this additional work by the City of Danbury.

**Tarrywile Park:** The purchase orders have been issued for the two projects trades and material. The work will be coordinated with the Tarrywile Park Authority, who we have met with. We will also be installing three new period doors per the required historical preservation and a new roof on the mansion. This work will be performed using our in-house resources and paid for through a LOCIP Grant. The material has been procured and delivered to the park. The contractor has begun the installing the new roof on the mansion.

**Head Start:** Banton Construction has installed the roof trusses, sheathing, interior framing and asphalt shingles. The brick masonry is 90% complete and we will begin the electrical rough and all other MEP trades presently. The contractor is several weeks behind schedule due to weather events and feels once the structure is totally closed in they will be able to make up the lost time.

**Citizens Volunteer Fire House:** Assisted Chief Herald with quoting for the replacement of the windows and siding using our in-house resources. We have discussed a small scope change to reduce project cost with Chief Herald.

Should you have any question regarding this report, please do not hesitate to call.

## **Engineering Report submitted by Farid L. Khouri, P.E., City Engineer:**

The following **assessment projects** are the only projects pending on the list based on residents' petitions:

1. Johnson Drive and Pembroke Terrace Sanitary Sewer Extension: Referred to an Ad Hoc committee at the City Council meeting.
2. Butternut Lane, Bayberry Lane and Boxwood Lane Sanitary Sewer Extension: Working on preliminary design and cost estimate.
3. Hawley Road Extension Sanitary Sewer Extension: Working on preliminary design and cost estimate.

**Long Ridge Road Bridge:** Field investigations were completed and the in-house design was finalized for construction. We are currently working with Corporation Counsel on securing an easement.

**East Franklin Street Bridge:** We completed the design to relocate the existing sewer in the brook with an above-ground pump station. Also, we met with the contractor and his engineer to address the scour problem that exists in the abutment walls of the bridge during the sanitary sewer relocation. Prices on the new pump station were obtained, and the equipment will be ordered soon.

**Miscellaneous Schools (Park Avenue, Shelter Rock, Stadley Rough and Mill Ridge):** The schematic design on the school has started with the selected architectural firms. Prep meeting with the State Department of Construction Service was completed and necessary applications have been submitted to the State for final approval for funding.

**Traffic Engineer and his technicians** are reviewing various land-use development plans; handling of public complaints and routine repair and maintenance of traffic control signal devices and pavement markings. The Backus Avenue corridor traffic lights plans and specifications have been accepted by the State and will be bid out next month. Construction will begin in early spring of 2013 for one season.

**Staff engineers** are reviewing various site plans, water and sewer applications, special exception applications, and subdivision applications for various land-use approvals of on-going development projects throughout the City. Field inspection of sanitary sewer, water mains and new roads are performed regularly on various developments. Review various drainage problems, including site visits, analysis and design.

**Survey crew** verifies various R.O.W., prepares surveys and easements for in-house design of City projects and assists other divisions in locating utilities in the field.

Should you have any questions regarding this report or any other issues related to your Engineering Division, please do not hesitate to contact me at (203) 797-4641.

#### **Highway Division Report submitted by Duke Hart, Superintendent of Public Services:**

The Highway Division was very busy during the first few weeks of November performing clean-up work from Hurricane Sandy. Mutual aid was provided to the town of Redding to assist them with their clean-up efforts. A minor snowstorm reminded the crews that winter is on its way.

The construction crew was able to perform three (3) drainage repairs on King St., Peck Rd. and at Rogers Park School. The in-house paving crew repaved Candlewood Dr., Concord St. and a portion of Deer Hill Ave. The sign crew installed one (1) new sign in addition to performing several repairs at various locations. Whenever possible, the pot-hole repair, apron and curbing crews were working on the never-ending lists. The leaf pick-up program resumed on November 26<sup>th</sup> and will continue into December.

The recycling truck continues to be a popular and much appreciated service to the residents. Our most used piece of equipment is the garbage truck which is dispatch for the collection of garbage and debris in the downtown area.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4605.

#### **Parks Maintenance Report submitted by Duke Hart, Superintendent of Public Services:**

November proved to be the busiest month of the year for the Parks Division. It took a couple of weeks to get the parks and school grounds back to standard. Transitioning from the fall sports season to the winter season was performed with leaf removal and fertilization. All of the veterans' memorials were prepared for the Veterans Day ceremonies. Holiday lighting on the ornamental street lights in the downtown area was also installed.

Should you have any questions regarding this report, please feel free to contact me at 203-796-1558.

### **Forestry Division Report submitted by Mark Miller, Foreman, Forestry Department:**

The city was impacted by a hard hitting storm in November. Due to advanced notice, the Forestry Division, along with other public works divisions was prepared to respond. Heavy tree damage was sustained throughout the city including 102 block roads. I would like to thank the Highway Division, Park Maintenance Division, Fire Department and Police Department for their assistance. The newly implemented storm system worked very well to provide updates regarding closed roads, downed trees and power issues. It was also very helpful to have contact with CL&P. All of the roads were opened with 5 days of the storm with the help of the heavy equipment operators from the Highway Division and line crews. Clean-up and take-downs of damaged trees will continue into December.

Should you have any questions regarding this report, please feel free to contact me at 203-797-4609.

### **Public Buildings Report submitted by Rick Palanzo, Superintendent of Public Buildings:**

**City Hall:** We are replacing the seating in the City Council Chambers. The sample has been submitted and approved. As a result of favorable pricing we will not only be able to replace the seating, but the carpeting as well! It will take twelve weeks until the new chairs are installed.

The Uncle Sam figure that was loaned to the City has been unveiled and is a terrific addition to the lobby. It is a sentimental reminder of the Great Danbury State Fair.

The server room in the lower level of city hall was in need of auxiliary cooling. The appropriate cooling system for the server room has been installed and is performing well.

**Farrington Park – Westside Open Space:** The chow house at the Farrington Park is being made ready for a new tenant (rental). Contracts have been awarded to contractors who will be painting the inside and outside of the building, as well as refinishing the wood floor. This should be completed before the end of December. I have spoken with deputy corporation counsel Pinter to begin preparing a rental agreement for our future tenant.

**Danbury Public Schools:** The DHS window replacement project that began in June was completed in October. When the window are finished that will wrap up this Honeywell project. This project has been performed well and will save the City money in energy costs.

The Alternative School on Locust Avenue has been undergoing waterproofing project that includes masonry replacement, repair, and waterproofing as well as replacing the roof and gutter. The roof is tight and the leaders and gutters are functioning as well as anticipated. The decorative cornice, which is being manufactured in Georgia, is due to be delivered in December. The scope of work for this project has been expanded to include the lower level windows. Funds have been identified and transferred to permit this project to proceed. The windows have been bid and awarded. We are awaiting shop drawing for approval. The work will take place in the spring.

**Old Library:** The elevator at the Old Library is out of service pending replacement of the main lift piston. The old piston removal and replacement will require three different contractors to perform the necessary work before the elevator company can install a new piston. The funding for this repair is through the Local Capital Improvement program. This project has been approved by the State of Ct and we have contracted with Otis Elevator Co for the replacement. The work is on schedule and will be completed before the end of January.

**Old Jail:** The air conditioning project be began earlier this year will conclude in December with the installation of energy efficient cooling for the front offices of the old jail building. This will replace the window air conditioners which are energy gluttons. The new units will not only provide better (even) cooling, but will do so at a much lower cost.

**Requests for Maintenance Service:** Attached please find the statistical report of repairs and maintenance work that the Public Buildings Mechanics engaged in during the month of November 2012.

In the month of November we received 202 new work requests and completed 168 work requests. In reviewing this report, you will find the repair time that was expended in major work categories, (current month versus previous month). Also listed is the total number of work order hours completed, (current month versus the previous month).

Public Building mechanics were engaged in Plumbing repairs with a total of 177.65 man-hours dedicated to this service. The next largest area of concentration was in Electrical repair work, utilizing 121.50 man-hours of labor. General Mechanical work came in as the third highest category with 70.50 man-hours.

Should you have any questions regarding this report, please do not hesitate to contact me at 203-797-4584. I am happy to discuss any portion of this report with you.

**Public Utilities Report submitted by David Day, Superintendent of Public Utilities:**

Enclosed is the monthly report to the Common Council for activities that took place in October 2012. Also attached is the Public Utilities Vehicle Maintenance Report.

As of November 15, 2012 there are 97 hydrants out of service. Repairs to hydrants are continuing. I will be happy to review the information with you.

Sincerely,

*Antonio Iadarola, P.E.*

Antonio Iadarola, P.E.  
Director of Public Works

# APPENDIX “A” PUBLIC BUILDINGS

## CITY OF DANBURY PUBLIC BUILDINGS DIVISION WORK REQUEST REPORT FOR NOVEMBER 2012
